2X FGF1 - Supreme restoration, stem cell booster

**Advanced restoration formula**

With a light creamy texture, this highly concentrated cocktail of precious active ingredients, including patented aFGF, Far-infrared powder and Botox-like peptides targets wrinkles, sagging skin, dark circles and puffiness (bags) under the eyes. It helps to refine the texture of eyelids, crow’s feet, reduce a dark circles around eyes and fine lines around the mouth.

“Alpha and Omega” is the most advanced restoration eye and lip formula provides superior care for most delicate skin on your face, helps to remove years and years of damage and negligence, revealing your natural and beautiful skin.

**Reverse aging – EMC rebuilder**

Skin aging is characterized by progressive changes in the regulation of cellular processes and miscommunication between cells and their immediate environment, the extracellular matrix (ECM). These malfunctions characterized by the increased activities of destructive enzymes and the reduced biosynthesis of major ECM proteins. As a result, the extracellular matrix is no longer renewed and the skin shows the effects of aging.
“Alpha and Omega” eye cream with Trifluoroacetyl Tripeptide-2 acts like extracellular matrix rebuilder, MMP 1 inhibitor. The body uses Trifluoroacetyl Tripeptide-2 for cell communication to boost healthy skin functions and reverse skin damage by enhancing fibroblastic collagen production. It helps to increase collagen synthesis, helps to promote ECM renewal and maintain its normal function.

**Stem cell activator— reverse signs of aging**

This is the most potent formula that combines gene therapy (FGF 1 peptide), Trifluoroacetyl Tripeptide-2, and Far Infrared Powder (FIR) to rejuvenate and restore the beauty of damaged or aging skin. The “Alpha and Omega” helps to activate the body’s own stem cells to repair damaged tissue and regenerates the skin, producing lasting and undeniable results.

The FGF-1 peptide (Acidic Fibroblast Growth factor), the stem cell activator, helps to increase new skin cell growth at least 10-20 times faster than with other skin care products.* It triggers not only grow of healthy collagen, but it also repairs and restores elastin fibers. FGF1 protein boosts natural restoration of extracellular matrix and Hyaluronic Acid; literally helping your skin to reverse signs of aging.

*In vitro and in vivo testing on humans

**2x FGF 1 –time release formula**

We added twice as much FGF1 to this supreme formula in two different forms in order to provide extra rebuilding and skin rejuvenating power to it.

“Alpha and Omega” eye cream contains two types of FGF1 protein: regular small molecule and liposomal encapsulated FGF1. Regular small molecule of FGF1 starts working immediately after application. Liposomal FGF1 acts a little different.

Liposomes are tiny bubbles filled up with FGF1 molecules. It attaches themselves to your skin cell membranes and slowly releases FGF1 directly to the cell. This time released formula stays in your system and keeps working long after you applied this product.

**Dark circles under eyes**

Our eye area has one of the most gentle and delicate skin on entire body. As we age, Hyaluronic acid, collagen and elastin production slows down. Dark circles under eyes become more defined due to broken capillaries, loss of collagen, and thinning skin.

This highly concentrated formula acts on both: the epidermal and dermal level, and helps to increase production of new fibroblast cells, collagen, elastin and hyaluronic acid. Skin naturally becomes thicker, stronger, and luminous. FGF1 and matrix rebuilding peptides works
synergistically and helps to rebuild broken capillaries, restoring normal functioning of the skin. Dark circles under eyes become less and less visible with each week.

**Puffiness under eyes – detoxify**

Bags under eyes — mild swelling or puffiness under the eyes — are common as you age. The skin that surrounds the eye becomes thinner, less elastic and get saggy with age. Normal fat that helps support the eyes can then migrate forward into the lower eyelids, causing the lids to appear puffy. With decreased lymphatic system function fluid also may accumulates in the space below your eyes, adding to a swollen appearance.

FIR releases energy of far infra red light into your skin and helps to speed up blood circulation and lymphatic drainage, promote faster toxin removal. Faster blood circulation promotes better oxygen intake by skin cells, improves their functionality, boosting cell metabolism.

**New cell grow – DNA repair**

Poor blood circulation due to pollution, smoking, medications, or physical illness takes a toll on your skin, making it dull and lifeless. Your body has all powers to repair and reverse those signs; it just needs a little help.

E’shee Alpha and Omega Eye cream with FIR powder recharges you skin with energy of “life light”, promotes cell growth, DNA synthesis and protein synthesis in cells. It increases blood circulation and oxygenation while, at the same time, deeply detoxifying it for dramatically improved functioning of the skin.**

**Clinical Studies on blood vessel functioning and the reduction of inflammation - USA and Japan.

**Dynamic wrinkle control**

Wrinkles and fine lines around the eyes and mouth are not only age related; it is just becomes more prominent as we age. It is also due to constant movement and muscle contraction.

Alpha and Omega eye cream contains peptide from plant source (Botox like peptide) which allows you to control both – biological and mechanical wrinkles without losing your personality and toxic side effects of Botox, while improving your skin texture. Your skin will become firmer and smoother with a noticeable reduction in the appearance of wrinkles.

**Results:**

- Firmer and healthier skin with increased volume
- Disappearance of fine lines and reduction in deep wrinkles
- Dramatically improved skin texture
- Helps to rebuild Extra Cellular Matrix and restore its function
• Helps to reduce puffiness by improving blood circulation and toxin removal
• Reduction of dark circles around the eyes
• Reduction of redness caused by rosacea
• Helps to repair broken capillaries
• Helps heal scar tissue such as burn scars, acne scars and other forms of dermatological scarring
• More even skin tone and youthful glow
• Stronger dermal structures in about 28 days

**Recommended for:**

- All skin types, all ages, women and men
- Dark circles under eyes
- Mild swelling and puffiness around the eyes
- Skin with broken capillaries
- Around the eyes (upper and lower lid) and area above upper lip
- Especially recommended for people with poor blood circulation

This is not greasy, non-comedogenic, fast absorbing formula

**How to use:**

After cleansing and toning your skin, apply Alpha and Omega eye cream with light, circular (massaging) motions around the eyes (lower and upper lid) and area above upper lip (or around the lips, if desired). Use morning and evening.

This cream can be used alone, as a part of skincare program, or combined with your favorite day and night cream or E’shee serums. If using serum, always apply serum first. Always use sunblock SPF 30+ during a day.

**Ingredients:**

Aqua, Butylene Glycol, Biosaccharide Gum-1, Algae Extract, Hydrolyzed Hibiscus Esculentus Extract, Trifluoroacetyl Tripeptide-2, Hydrolyzed Elastin, Soluble Collagen, Panthenol, Allantoin, Dipotassium Glycyrrhizate, Sodium Acrylates/C10-30 Alkyl Acrylate Crosspolymer, Disodium EDTA, Sodium Hydroxide, Xanthan Gum, Hyaluronic Acid, Sodium Lactate, Mentha Piperita (Peppermint) Oil, Rosmarinus Officinalis (Rosemary) Oil, Phenoxyethanol, Far Infrared Ceramic Powder, CI 19140, CI 16035, Human Recombinant acidic Fibroblast Growth Factor (aFGF).
