## E'shee Skin Care

### Healthy and vibrant skin made easy with E'shee

Posted by Meredith Spears on July 20, 2010 04:50 p.m.

When we were little girls, our beauty products probably consisted of glittery lip glosses and cheap “penny” cosmetics. As we get older, our beauty products grow up with us. When it comes to updating our beauty regimens, it’s important to incorporate the latest anti-aging products, no matter how much it might pain us. The stigma with anti-aging products, however, is that it’s intimidating trying to select the best of the best and most effective products on the market. I’ve come to love one new, exciting, and one-of-a-kind skin care line – E’Shee. They offer high-quality products used by cosmetic surgeons and dermatologists that you can use right in your own home, saving you time and money on expensive procedures, not to mention making it much easier to access.

One of the lines in E'Shee's skin care products, the "Gene Therapy" Serum Cellular Repair line, utilizes stem cell technology to repair fine lines and wrinkles while strengthening the structure of your skin. Specifically, this is achieved using an ingredient called FGF-1, which is a key protein used by our own stem cells to trigger new cell growth and also plays a critical role in wound healing and post-operative care. This protein is produced via an exclusive patented cloning process, rather than a harvesting procedure that involves animals or plants. In addition to combating lines and wrinkles, this product repairs broken capillaries and improves the overall quality of your skin.

My favorite is the "Bota Therapy" Concentrate Serum. It repairs fine lines and wrinkles, strengthens the dermal structure, and produces a Botox-like effect without any of the toxic side effects. It contains the latest anti-aging peptides and FGF-1. These high quality ingredients aren't available in any other skin care product on the market! The superior technology involved in the E'shee Skin Care line's ingredients sets these products far above the competition. You can find out more about this great line and its ultra-unique ingredients by going to <http://esheesthetic.com/>.
