

E'shee Clinical Esthetic™

Serum Vitalizing C

TAKING YOUR VITAMINS NEVER FELT SO GOOD

Advanced 20% Vitamin C

Natural Vitamin C is very powerful ingredient, but it is also very fragile. It is easily destroyed when exposed to the oxygen in the air. Ordinary skin care products simply can't contain enough active Vitamin C to make a difference.

E'shee liposomal technology allows stabilizing Vitamin C and protecting it from oxygenation. Vitalizing Serum C delivers up to twenty times more active vitamin C directly to your skin cells; it stays in your system and works for up to 48 hours. This is a time released formula.

Brightening and protection

Vitalizing Serum "C" with highly stable and concentrated liposome encapsulated 20% vitamin C - provides powerful anti oxidant protection and boosts skin's immune system. Vitamin C protects skin from tissue-destroying oxidants, helps to fight disease and infections, leading to beautiful, strong, and healthy skin.

Vitalizing Serum "C" helps to reduce skin inflammation which often leads to pigmentation spots. Vitamin C also brightens existing pigmentation spots leading to more even skin tone and radiant youthful glow.

Collagen repair – wrinkles

Vitamin C helps the body repair lines and wrinkles and maintains youthful appearance by stimulating natural collagen and elastin production. Clinical studies have shown that prolonged use of Vitamin C results in an eight-fold increase in the synthesis of collagen. It's leading to healthier, luminous skin with fewer wrinkles and radiant glow.

Vitamin C virtually erases the signs of past damage, greatly refines the skin texture and skin tone, helps reduce the size of pores, post acne scars, and other dermatological scarring. Even most sensitive skin will love this strong yet gentle formula.

Anti aging reparative Copper Peptide

The Copper Peptide is a naturally occurring human tripeptide. It possesses an amazing anti aging benefits: it plays important role in activation of wound healing, attraction of immune cells, anti oxidant and anti inflammatory effects, stimulation of collagen and glycosaminoglycan synthesis in skin fibroblasts and promotion of blood vessels growth.

As we age, our Copper Peptide level drops dramatically. If mixed in ordinary formulation, Copper Peptide can cause to Vitamin C to become inactive and lose its beneficial properties. Advanced liposomal technology of E'shee Vitalizing Serum "C" allows both of those ingredients co-exist in one formula and deliver the best results for your skin.

Results:

- Reduce collagen depletion and the breakdown of elastin
- More even and bright skin tone
- Firmer, smoother, and more elastic skin
- Improved skin texture
- Decreased skin inflammation
- Reduction of fine line and wrinkles
- Reduced pigmentation spots
- Skin appears healthy and radiant

Recommended for:

- All skin types and all ages
- Women and men
- Skin lack of elasticity
- Dull, stressed, and tiered skin,
- Smokers or second-hand smokers
- Uneven skin tone

This formulation is extremely well tolerated and can be used by men and women without fear of troublesome skin reactions such as sunlight sensitivity. Generally improvement in the overall appearance of the skin can be seen within 8 to 12 weeks of daily use.

Safe for area around eyes.

This is a non comedogenic, fast absorbing, non greasy formula.

How to use:

Use one application at night after cleansing and toning your skin apply 2 to 4 drops of E'shee Vitalizing Serum C on your fingers and gently massage on facial area, neck and décolleté, including eye area (can be applied to lower and upper lid).

E'shee Vitalizing Serum C can be used with other E'shee serums and under any creams. For best results recommended using with E'shee Cellular Repair Night Cream. Always use sunblock SPF 30+ during a day.

If used as directed – this is 2-3 month supply.
